

[e-Skids 17.5 MV Plug-and-Play Power Solution](#) [Inventory ID #215469]

- 103 units available as a batched.
- Skid power solution guarantees safe, reliable network connection in a 13.8 kV/380-220V skid-based plug-and-play substation.
- Units house all necessary components of a complete substation such as power transformer, electrical equipment, protection, and control systems, auxiliary AC/DC services.
- 380/220V Output (other voltages as per customer option).
- Applicable Areas:
 - Power Plants.
 - Mining.
 - Industry.
 - Temporary Installation.
 - Events.
 - Revamps.
 - Working Sites.
- Transformer Specifications:
 - Primary Voltage: 13.8/13.2/12.6/12.0/11.4 kV.
 - Power: 2000 – 1500 – 1000 – 750 500 300 kVA.
 - Primary power connections: Triangle.
 - Secondary power: 380/220V.
 - Secondary Power Connections: Star with neutral.
 - Connection group: DYN 1.
 - Frequency: 60 Hz, 50 Hz optional.
- Location: South America.
- Contact for more information.
