

[iCON IGR 100 Gold Recovery Plant](#) [Inventory ID #194309]

- Modular self-contained gold recovery system.
- Custom stand.
- In the standard configuration, material flows as follows:
 - Feed sand/gravel into vibrating [screen](#).
 - Screen divides your feed into 2 mm plus and 2 mm minus size fractions.
 - 2 mm plus will pass over the screen, over the Mini Grizzly and to the Sluice.
 - 2 mm minus will pass through the screen and down to the [slurry pump](#).
- Pump will move the fine material up and into the gravity [concentrator](#).
- Includes Tandem Axle Trailer.
