

Marcy Pulp Density Scales [Inventory ID #41874]

- Marcy Direct Reading Pulp Density and Specific Gravity Scale
- Speeds up the determination of pulp densities, specific gravities of pulps or liquids, specific gravity of dry solids.
- Eliminates errors in reading charts or graphs and prevents errors in calculations.
- Circular dial is equivalent to a 47" beam balance for greater sensitivity.
- Entire unit is supported by a top ring.
- Scale is accurately set at the factory.
- Interchangeable dials make weighing applicable for any range of solids of light or heavy density.
- Please contact our office for current pricing and availability.
