

Polaris Plate Heat Exchanger

[Inventory ID #109056]

- **Polaris** Plate Heat Exchanger.
 - Model: 5-15-1G-48.
 - Design pressure: 150 psi.
 - Design temperature: 230°F/110°C.
 - Inlet: 2 inch.
 - Outlet: 2 inch.
 - Features:
 - Compact Design: lightweight and use limited floor space.
 - No cross-contamination: media circuits are individually gasketed.
 - Expandability: to enlarge, loosen compression bolts and add the plates you need.
 - Greater performance efficiency: Use less surface area to accomplish same heat transfer as shell-and-tube exchangers.
