

[RP4 Concentrating Table](#) [Inventory ID #166147]

- Designed for separation of heavy mineral and gemstone concentrate down to 1 micron size.
- Can process up to 599 lbs/hr of black sand magnetite or pulverized rock with little or no losses.
- Uses a unique reverse polarity of rare earth magnets.
 - Causes magnetite to rise and be washed off into the tails leaving the gold travelling to the catch.
- Quantity: 3.
