

Termite Electric Hydraulic Diamond Core Drill

[Inventory ID #858723]

Make: Coeur Products

Model: The Termite

Basic Equipment List:

- Complete Termite Core Drill
- 20 HP Electric Hydraulic Power Pack
 - 208-230/460 Volt
- 19 x ARQTK Rods – Boart Longyear
- Other Rods, Bits, Spares, Tools, Tool Box Etc.
- Operating Manual

Location: Western USA

Specs:

- Max. Feed Force: 20 kN
 - Approx. 4,400 lbs.
- Max Pull Force: 18 kN
 - Approx. 4,000 lbs.
- Revolutions: 1450 RPM

- Rod Running Speed: 1.7 m/sec
 - Approx: 4.6 ft./sec
- Max. Feed Speed: 1.3 m/min
 - Approx. 3.3 ft./Min
- Stroke: 0.5 m
 - Approx. 20 in.
- Power: 15 kW
 - Approx. 20 HP

Description:

The Termite Core Drill offers lightweight, modular hydraulically powered solutions for short-hole exploration, definition and grout hole drilling. The Termite Core Drill has a straight forward, clean design that demands few spare parts, making it the most reliable core drill of its kind on the market.

The Termite Hydraulic Core Drill is supplied by state-of-the-art hydraulic components. Equipped with a reliable rotation unit that is driven by a high-tech belt drive, The Termite Core Drill offers the best solution for consistent drilling and accuracy. Our drill is an optimal choice for hole depths up to 100 meters (300 feet).

Not limited to the mining industry, the Termite Core Drill is also designed for construction core drilling purposes with large and small thin-wall diamond bits, as well as for use in the dimensional stone industry for precision drilling of wire cutting holes, and to check on the quarry's material quality.

The total weight of the Termite Core Drill and control panel is only 160 kg (350 lbs.), making it easy to maneuver to and from any site.

Advantages of choosing the Termite:

- Affordability
- Few spare parts
- Simple design for quick maintenance (no special tools or technicians are needed to repair)
- Ease of operation (avoid expensive contractors: do the core drilling yourself!)

The Termite Hydraulic Core Drill can be powered with:

- Tractor PTO
- Bobcat or similar skid steer machines by utilizing their on board hydraulic system
- Diesel or gas power unit
- Electric power unit
